The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status				-					
1)	Responsive to communication(s) filed on	_•

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Note that claim 8 is identical to claim 7, and should be canceled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 9-11, 14-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Manookian, Jr. (4,136,650). Note a condensing media 28, collection unit (filter housing 24), and reservoir 337.

Claims 12 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Manookian, Jr. (5,586,996). Note a condensing media 56 and collection unit (filter housing 46).

Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Uebelhoer et al (5,429,101). Note Figure 2, which shows the condensing media 41-43, collection unit 51, and the blowby gases and oil exiting the condensing media and traveling in a common downward direction away from the condensing media

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Manookian, Jr. (4,136,650) in view of Fernandez (4,561,409). Manookian, Jr. shows everything except the condensing media being a helical coil. Fernandez teaches that it is old in the art to utilize a helical coil 50 as a condensing media to separate oil from blowby gases. It would have been obvious to one having ordinary skill in the art to substitute a helical coil filter for the filter of Manookian, Jr. since the two types of filters or condensing medias are art recognized alternatives, known for the same purpose.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Manookian, Jr. (4,136,650) in view of White (4,169,432). Manookian, Jr. shows everything except the condensing media comprising a wire mesh. Manookian, Jr. is silent as to the type of filter utilized. White teaches that it is old in the art to utilize a wire mesh filter. It would have been obvious to one having ordinary skill in the art to utilize a wire mesh filter, since this is a conventional type of filter, utilized for the same purpose as the filter in Manookian, Jr., i.e. to condense oil from the blowby gases.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3747

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marguerite J. McMahon whose telephone number is 703-308-1956. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yuen Henry can be reached on 703-308-1946. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
